Subject: RE: Controlled Correspondence - Review of EPA's Draft Assessment entitled Toxicological Review of Benzo[a]pyrene (September 2014) (DUE: 5/20/2016)

Well, I brought it up at IRIS Management meeting this Monday, but all I heard was crickets....so I take that as a no.

I think we're going to go ahead and request an extension in CMS for this (don't worry -- happens all the time). Do you know if IRIS management has reviewed the response?

Subject: FW: Controlled Correspondence - Review of EPA's Draft Assessment entitled Toxicological Review of Benzo[a]pyrene (September 2014) (DUE: 5/20/2016)

I haven't heard anything back about this so I am assuming either it is fine, or no one has looked at it. Looks like it is supposed to be posted on Friday.

Hi Dahnish, here is a draft response letter to the SAB.

Vince, I wasn't sure if we wanted to take this opportunity to propose that the dermal slope factor will be on a different tract than the rest of the assessment?

Let me know if you have suggestions.

-Kathleen

Subject: Controlled Correspondence - Review of EPA's Draft Assessment entitled Toxicological Review of Benzo[a]pyrene (September 2014) (DUE: 5/20/2016)

Hi all – Attached to this email is the controlled correspondence from the SAB panel that reviewed the IRIS BaP assessment, which summarizes their overall recommendations and comments. The Administrator's Office has asked that our response be uploaded back into the CMS database by **May 20, 2016**. Please note that the response is directed from the Administrator back to the SAB chair (Drs. Peter Thorne and Elaine Faustman) rather than a response from NCEA.

Just for convenience, I've attached to this email past IRIS responses to the SAB, including EtO and ammonia. This will give some idea of the formatting and structure that folks have recently used when responding to this type of controlled correspondence from the SAB.

Let me know if you have any questions or comments.

Thanks!

Dahnish
